We want to sincerely Thank You for browsing through our new FALL 2010 Wonder Wafers Product Catalogue.

Wonder Wafers were originally born to perform one very simple concept - make a much BETTER Air Freshener application for the Carwash and Automotive Industry than had previously been used for the past 50 years.

AND THEY DID!!!

Wonder Wafers not only solved the numerous problems associated with liquid air fresheners - but actually changed the way the entire Industries would think about their Air Freshener Programs!

Wonder Wafers has since evolved and found a niche in thousands of other Industries and Businesses worldwide! For that - we are very proud and grateful. We would very much like for You to become part of the Wonder Wafers family. We want your business - and we promise to work hard to earn it and keep it! Now that you've heard our side - take a moment to look over the next 2 pages and see what just a few of our cherished Customers have to say about Wonder Wafers - and THANKS again for looking!
